

TRẦN HOÀNG HÀ

AI Engineer · Fullstack Developer

Date of Birth: Dec 06, 1994

Phone: 0362044038

Address: CT4A Me Tri Thuong, Nam Tu Liem, Hanoi, Vietnam

Gender: Male

Email: tranhoangha94@gmail.com

OBJECTIVE

A Fullstack Developer transitioning into AI Engineering, aiming to apply a solid Frontend/Backend foundation to build real-world AI products (LLM, RAG, intelligent assistant systems). Long-term goal: to grow into an AI Engineer / Technical Lead role, contributing through technical expertise, product thinking, mentoring ability, and bringing AI solutions into real-world operation.

PROFESSIONAL SUMMARY

- Currently enrolled in Vingroup's AI Thực Chiến (Applied AI) training program (since 28/05/2026) and serving as a Lab Coach intern at VinUni (since 14/07/2026).
- 5+ years of software development experience, specializing in Frontend for large-scale applications and microservice architecture.
- Proficient in modern Frontend frameworks: ReactJS, NextJS, VueJS, Angular.
- Backend experience with NodeJS (ExpressJS, NestJS) and Prisma, collaborating effectively across Frontend and Backend.
- Hands-on experience building AI products: an LLM chatbot with RAG and realtime streaming (LLM Chat), an AI-powered training platform that generates courses/exams from documents (AI Mentor), and an AI Academic Advisor assisting students with study planning.
- Skilled at integrating Frontend with AI/LLM services: streaming responses (SSE, ReadableStream), complex state management (redux-saga, EventChannel).
- Experience in application architecture, RESTful API design, multi-source data integration, and system performance optimization (K6 performance testing).
- Proven Leadership and Project Management ability, proactively owning projects from requirement gathering to delivery for both freelance and internal projects.
- Skilled at mentoring team members, code review, and shaping source code architecture.
- Proficient in Automation Testing (Selenium, CodeceptJS) and basic DevOps (Docker, GitLab CI/CD).
- Passionate about modern technology, especially applying AI/LLM to real-world products.

EDUCATION

2026	Vingroup Applied AI Talent Program – VinUni AI20K Build Phase <i>Applied AI Practical Training · Team 163</i> • Vingroup's hands-on AI training program for engineers, focused on building applied AI products from idea to production within a short timeframe (Build Phase). • Core content: designing LLM/RAG-based AI systems, tool-calling/guardrails, combined planner/rule-based engines, basic MLOps/observability workflow (Langfuse), and cloud deployment (Vercel, Railway, Docker). • Member of Team 163: built and deployed the V University Portal integrated with an AI Academic Advisor (see Projects section for details).
2012 - 2017	Posts and Telecommunications Institute of Technology (PTIT) <i>Major: Information Technology · Specialization: Software Engineering</i> • Programming languages: C, C++, Java. • Web Services, Android mobile application development. • Algorithms and Data Structures; System Analysis and Design. • Software Engineering; Project Management.

CERTIFICATE

- 12/2021 — freeCodeCamp Certificate: JavaScript Algorithms and Data Structures.
- 12/2021 — freeCodeCamp Certificate: Frontend Development Libraries.
- 12/2021 — English Proficiency Certificate, Pre-Intermediate level.

TECHNOLOGY & SKILLS

AI / LLM	OpenAI API integration (gpt-4o-mini), RAG pipeline design, prompt/context engineering, Vector DB (Supabase pgvector), tool-calling & guardrails concepts for LLMs, AI system observability (Langfuse), Frontend integration with optimization planners (OR-Tools CP-SAT).
Data Structures & Algorithms	Array, String, Stack, Queue, Sorting, DFS, BFS.
Frontend – Frameworks	ReactJS, NextJS, VueJS, Angular.
Frontend – Languages	HTML5, CSS3, JavaScript (ES6+), TypeScript, jQuery, TanStack Query.
State Management	Redux, Redux Saga, Pinia.
UI & Styling	Tailwind CSS, Ant Design, Material UI, Bootstrap, Styled Components.
Design System	Atomic Design, Storybook.
Backend	NodeJS, ExpressJS, NestJS (basic), RESTful API design, Frontend–Backend integration; Java (basic).
Testing	Jest, CodeceptJS, Python Selenium.
DevOps & Tools	Docker, GitLab CI/CD, GitHub, Postman, Figma, Adobe XD, Vercel, Jira, SVN.
AI Tools	ChatGPT Plus, GitHub Copilot, GitHub Copilot Coding Agent.
VibeCode Tools	Claude, Cursor AI.
Design Tools (AI)	Stitch (Google), Google AI Studio.

Languages

English at Intermediate level (B1) — able to communicate effectively in daily work; holds an internal English communication certificate from FPT Software.

PROFESSIONAL EXPERIENCE

14/07/2026 –
Present

Lab Coach (Intern)

VinUni · Vingroup AI Thực Chiến Program

- Support and guide trainees throughout the process of building applied AI products within the program.
- Work alongside teams to review progress and troubleshoot technical issues during the Build Phase.

28/05/2026 –
Present

AI Engineering Trainee

Vingroup Applied AI Talent Program — AI Thực Chiến

- Participating in Vingroup's applied AI training program, focused on building applied AI products from idea to production.
- In-depth learning of LLM, RAG, tool-calling/guardrails, basic MLOps/observability, and cloud deployment.

10/2023 - 01/2026

Front-end Developer

FPT Software

- Developed Frontend for both outsourcing and internal projects.
- Required to work independently and proactively.
- Received requirements from PM/Team Lead, reported progress and issues; self-estimated effort and planned work to meet deadlines.
- Read Basic Design Documents to analyze requirements.
- Followed project coding conventions and used the client-provided UI Library.
- Took full ownership of Frontend issues, working independently; on track to become a Frontend Lead.
- Interviewed with clients to onboard new projects.

06/2023 - 09/2023

Front-end Developer

KIAI Soft

- Developed Frontend for outsourcing projects.
- Met with PM, Testers, and BRSE to gather requirements, break down tasks, and report issues; assisted with project documentation.
- Updated package versions periodically and reported to BRSE.
- Fixed bugs across product releases and reported findings to clients (given limited documentation), tracing code to understand system behavior.
- Built automated testing tools using Python Selenium and CodeceptJS.
- Set up local servers using Docker Network, working with microservices; occasionally reviewed code for new team members.

05/2021 - 04/2023

Front-end Developer

VMO Holding

- Developed outsourcing projects; built new features using ReactJS and NextJS.
- Learned and applied trending libraries: Tailwind CSS, Ant Design, NextJS.
- Participated in code reviews, learning best practices for clean, maintainable, well-documented code.
- Met with PM, BA, and the dev team to gather requirements, break down tasks, and report issues.
- Developed features/UI based on SRS and Figma designs; helped teammates handle complex logic and refactor code.
- Worked under Agile Scrum; occasionally reviewed code for new team members.

04/2017 - 08/2020

Front-end Developer (Fresher → Junior)

Samsung Vietnam Mobile R&D Center

- Developed internal corporate projects; worked with PM/Tech Lead to analyze requirements and propose solutions (Agile Scrum).
- Gained hands-on experience with HTML5, CSS3, JavaScript, and ReactJS (mainly Class Components).
- Used Bootstrap and Material UI; built a solid understanding of responsive design principles across layouts.
- Collaborated with UX/UI designers to implement responsive designs, ensuring a consistent experience across devices.
- Supported Backend developers with API fetching and data rendering on device screens.

PROJECTS

2026 (VinUni AI20K
Build Phase)

AI Academic Advisor – V University Portal

Team 163 · Fullstack Developer

Built a student information portal (V University Portal) integrated with an AI Academic Advisor to help students check prerequisites, select courses, and build valid study plans; enabling advisors to review plans faster and admins to manage academic data (courses, curricula, career tracks, users).

- Developed the Web Portal using Next.js 16: role-based login flow for 3 roles (student / advisor / admin), Study Planner, Advisor Chat, and admin/advisor management pages.
- Integrated with the FastAPI Backend for study-plan generation (OR-Tools CP-SAT planner), AI Academic Advisor chat sessions, and Quick Help powered by RAG over academic regulation documents.
- Built the Advisor Chat interface scoped to each study plan (session management by planId, markdown rendering, session deletion with notifications).
- Collaborated on production deployment: Frontend on Vercel, Backend on Railway; monitored quality via input/output guardrails and observability metrics (Langfuse).

Technology: Next.js 16, TypeScript, Tailwind CSS, FastAPI, Supabase (Auth + pgvector), OpenAI gpt-4o-mini, OR-Tools CP-SAT, Docker, Vercel, Railway, Langfuse.

9/2025 - 11/2025

AI Mentor

Fullstack Developer · Team size: 14

Built an AI-powered training system helping enterprises design training programs, generate courses/exams from documents, and track employees' learning progress; evaluating training effectiveness. Adopted by large enterprise clients, including Techcombank.

- Participated in business analysis and proposed technical solutions for system features.
- Built shared UI layouts and a common component library, defining standards and usage guidelines for the whole project.
- Developed and fixed bugs for several features (both FE and BE).
- Performed code reviews to ensure quality and compliance with project standards.

Technology: NextJs, NestJs, Prisma, Material UI, Lexical editor, Axios.

4/2025 - 5/2025

KDV Project (Freelancer)

Leader, Developer, PM · Team size: 3

Designed and developed a corporate marketing website for an industrial quality inspection company. The project is live and continuously updated based on real-world requirements.

- Led the project end-to-end, from requirements gathering to deployment.
- Worked directly with the client to analyze requirements, propose solutions, and build website content.
- Designed the project structure, shaped the source code architecture, and standardized the development process.
- Planned, assigned tasks, and tracked progress; reviewed code; directly developed the core UI and features.
- Deployed the system to production, configured the domain, and operated the live environment.

Technology: NextJs, TailwindCSS, ExpressJs, Antd, Zalo (plugin), Vercel, Trello.

05/2025 - 8/2025

LLM Chat

Frontend Developer (1 FE dev) · Team size: 6

Built an AI chatbot using an LLM for internal enterprise support: reading/analyzing documents, gathering contextual data, and answering questions to help employees look up knowledge.

- Designed the chatbot's UI/UX; participated in requirement analysis and feature definition on top of a ChatGPT/LLM foundation.
- Built the base project and Frontend architecture to ensure scalability and maintainability.
- Developed Frontend UI and features, integrating APIs from the Backend and AI services.
- Proactively handled Frontend issues to ensure a stable user experience (streaming responses).

Technology: ReactJs 18, Vite, Antd, Tailwind CSS, ReadableStream + redux-saga + EventChannel, Docker, GitLab CI/CD.

12/2024 - 03/2025

Map OSS Generation

Frontend Developer · FPT Software · Team size: 4

Developed a Google Maps-like digital map system to monitor and manage telecom services; supporting multi-layer display and optimizing performance for large-scale geospatial data.

- Participated in the design phase, proposing ideas and solutions.
- Developed map features, displaying Layers, Markers, Clusters, etc.
- Researched the K6 testing tool; fixed Polygon and Hexagon rendering issues on the map.

Technology: VueJs3, OpenLayer, Turf, Pinia, Geoserver, K6 performance testing, AWS.

9/2024 - 12/2024

OSS1 Generation

Frontend Developer · FPT Software · Team size: 8

Published UI for a banking application, converting Figma designs into web interfaces with high accuracy and consistency.

- Converted UI designs from Figma into Frontend code.
- Ensured accurate, responsive, and consistent UI across screens; delivered at a pace of ~5 screens/day.
- Fine-tuned UI based on QA and client feedback.

Technology: Html5, CSS3, VueJs3, Tailwind CSS, AGGrid.

6/2024 - 8/2024

Customer Care

Frontend Developer · FPT Software · Team size: 8

Upgraded an internal ERP system, focusing on the Customer Care module for managing customer information.

- Developed UI based on new designs, ensuring consistency and usability for internal users.
- Analyzed issues with the team and proposed UI and business-logic solutions; fixed bugs to ensure system stability.

Technology: Angular 4, Tailwind CSS.

4/2024 - 5/2024

Won App

Frontend Developer · FPT Software · Team size: 5

A mobile-first application focused on UI implementation and optimizing user experience on mobile devices.

- Converted Figma designs into Frontend code with a mobile-first approach.
- Ensured responsive UI compatible with multiple screen sizes; delivered at a pace of ~7 screens/day.

Technology: Html5, CSS3, NextJs, ReactJs, TypeScript, Ant Design, Storybook.

10/2023 - 03/2024

Genius

Frontend Developer · FPT Software · Team size: 14

An enterprise accounting system built on microservice architecture, integrating multi-source data and handling complex business processes.

- Worked with the microservice system and integrated multi-source data on the Frontend side.
- Participated in daily meetings, analyzed requirements, and estimated effort; analyzed Basic Design documents to understand business logic.
- Collaborated with testers to debug and fix both common and complex logic issues; developed features and wrote unit tests.

Technology: HTML, CSS, Tailwind, Antd, Styled Components, React Hook Form, Material UI, React TypeScript, Redux (Saga), Atomic Design, NextJs.

06/2023 - 09/2023

Training Service

Frontend Developer · KiaiSoft · Team size: 5

Maintained and upgraded an HR training system with no initial documentation; the team analyzed the source code, created technical/business documentation, fixed bugs, and developed new features.

- Worked with the microservice system and integrated multi-source data; traced code to understand business logic.
- Took full ownership of Frontend issues; developed new features including multi-language support.
- Wrote automated tests using Python Selenium and CodeceptJS; created and updated technical documentation.

Technology: HTML, CSS, Tailwind, Antd, Styled Components, React Hook Form, Material UI, React TypeScript, Redux (Saga), NextJs.

09/2022 - 04/2023

IGV

Frontend Developer · VMO · Team size: 12

Built an English learning platform for IIG English from the ground up, including a student learning website and an Admin system. Involved throughout the full project lifecycle.

- Involved from project kickoff to completion, gaining a full understanding of the business flow and Frontend architecture.
- Integrated third-party services: Facebook, Google, Elsa English.
- Worked closely with PM, Tech Lead, and BA; debugged and fixed complex UI/logic issues together with QA.

Technology: HTML, CSS, Tailwind, Antd, Styled Components, Easy Dev (UI Framework), React TypeScript, Redux (Saga), NextJs.

04/2022 - 07/2022

Icook

Frontend Developer · VMO · Team size: 8

An e-commerce website for the food industry, supporting product display, ordering, and content management.

- Participated in daily meetings and effort estimation with the PM; worked directly with clients to understand requirements.
- Developed new features and maintained code for new team members; served as Frontend lead for an assigned module.

Technology: HTML, CSS, Tailwind, Antd, Styled Components, ReactJs, TypeScript, Redux Saga.

08/2019 - 08/2020

Logistic Portal

Frontend Developer · SVMC · Team size: 4

An internal logistics management system for a Samsung manufacturing plant, supporting monitoring and management of logistics processes.

- Worked with stakeholders to understand factory business processes and proposed suitable UI solutions.
- Developed new Frontend features and maintained existing code; supported new team members.

Technology: HTML, CSS, Material UI, ReactJs, TypeScript, Redux.

04/2017 - 06/2019

Bixby Utterance Tool

Frontend Developer · SVMC · Team size: 3

An internal tool for managing and training language utterance data for Samsung Galaxy's Bixby virtual assistant.

- Implemented and improved UI features for the utterance management tool.
- Fixed UI and logic bugs to improve stability; updated Frontend logic per requirements.

Technology: HTML, CSS, Material UI, ReactJs, TypeScript, Redux.
